The AI Data Problem

Your Chatbot Is Only As Smart As Your Data.

AI and chatbots are only as good as the data they're trained on.

Garbage In, Garbage Out -

Bad data leads to unreliable, outdated, or unsecure AI Models.

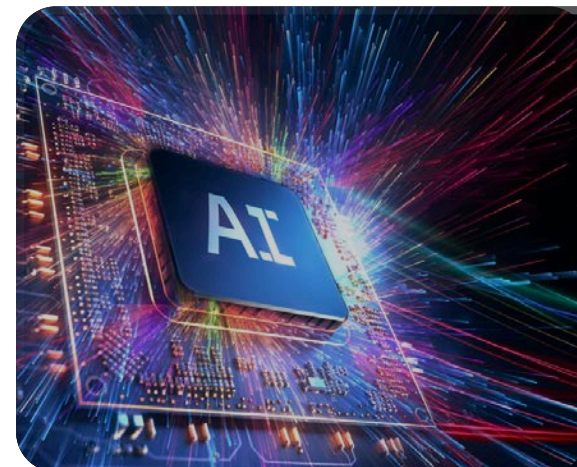

Data Overload -

Unstructured data from multiple sources overwhelms AI models, leading to inconsistent and unreliable outputs.

Integration Issues -

Without proper data preparation, connecting data sources results in incomplete, outdated, or irrelevant data feeding into chatbots.

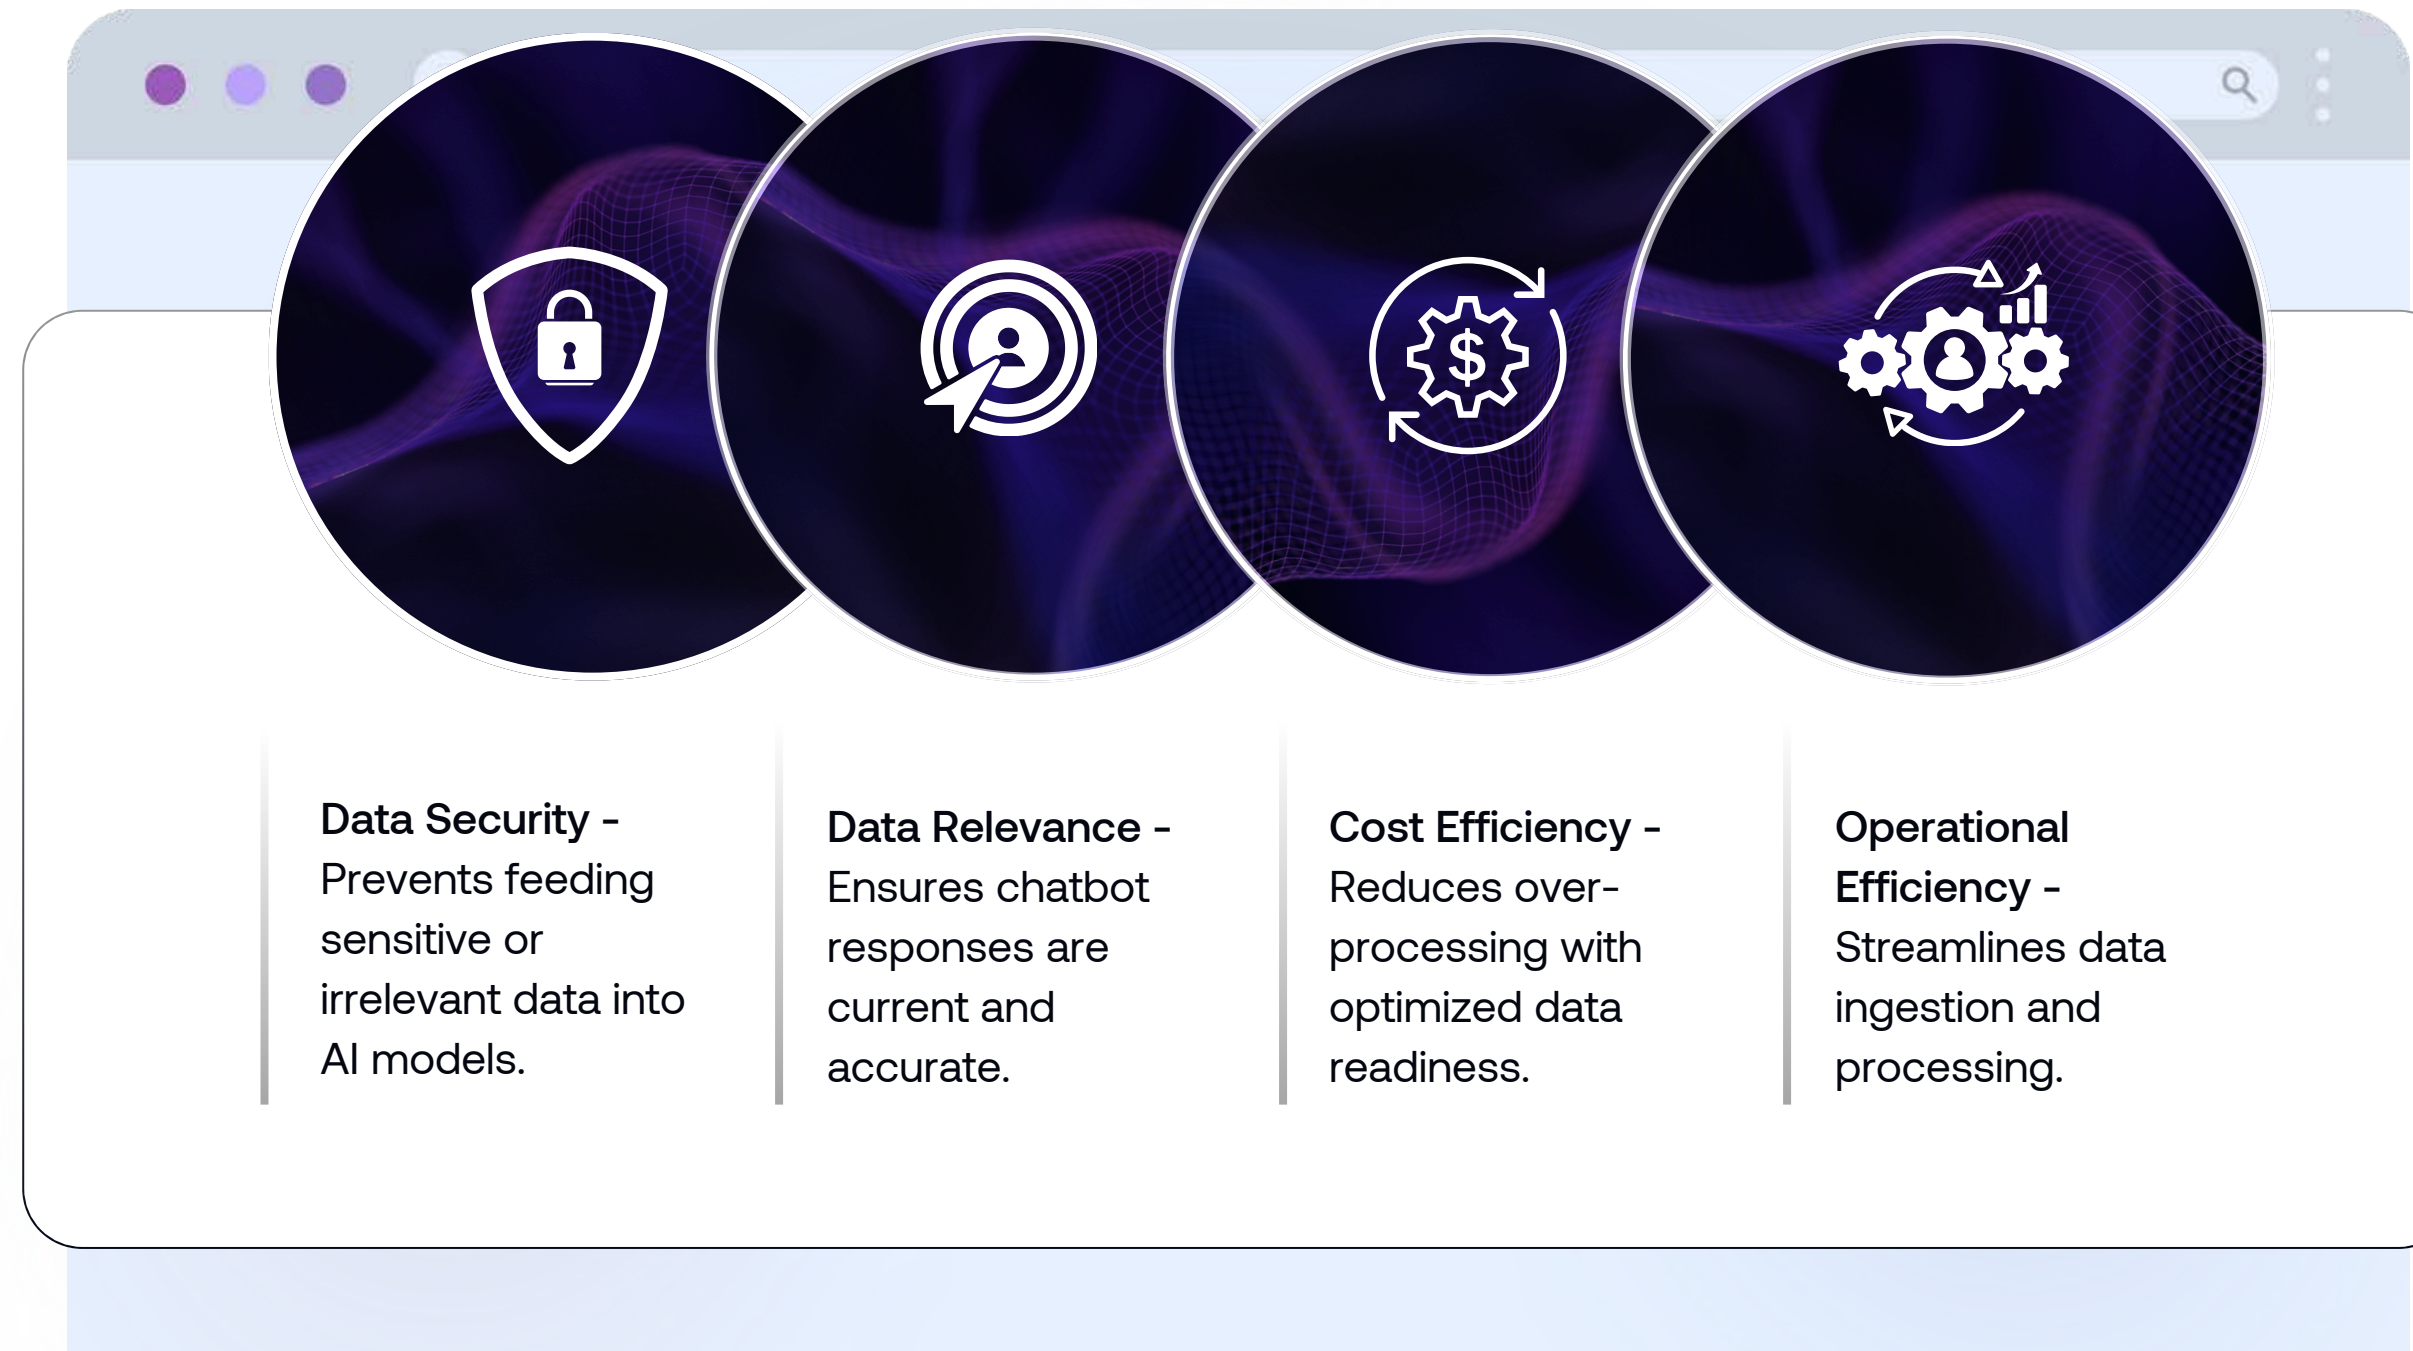

Aparavi changes this -

Imagine if there was a way to ensure your chatbot always had clean, relevant, and secure data...

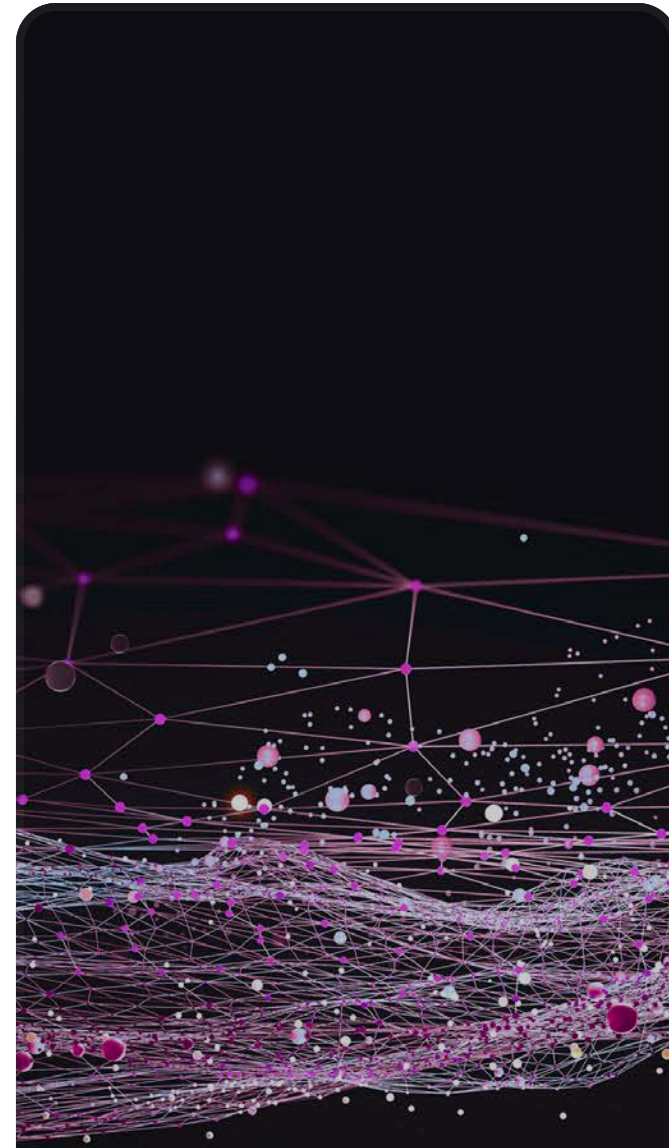

Why Data Preparation Matters

The Missing Link For Smarter AI

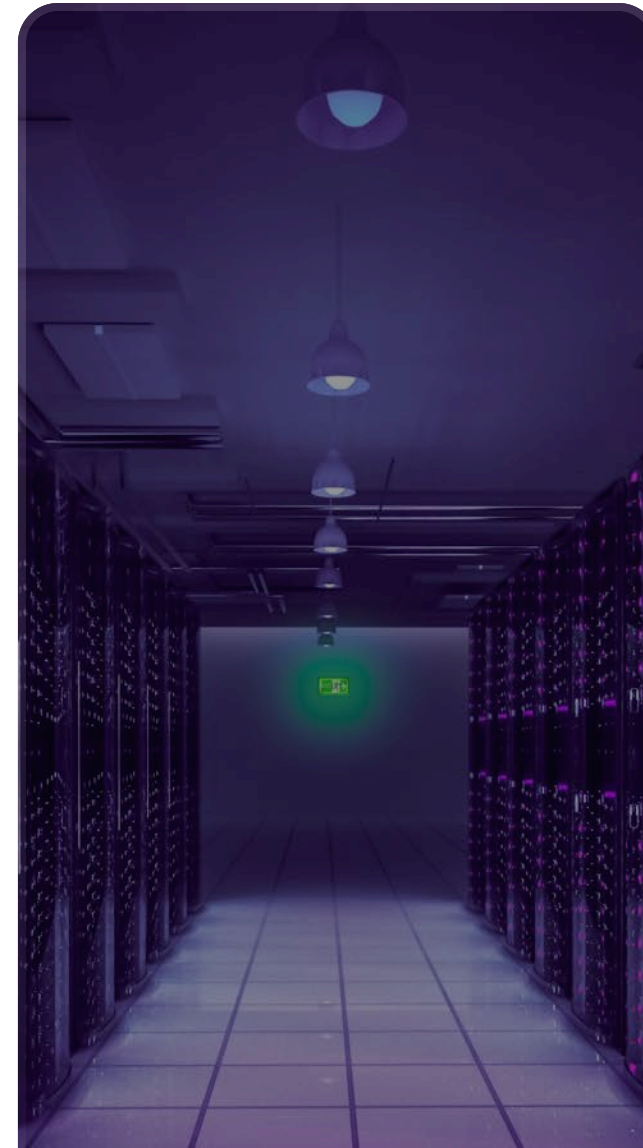

Enter Aparavi

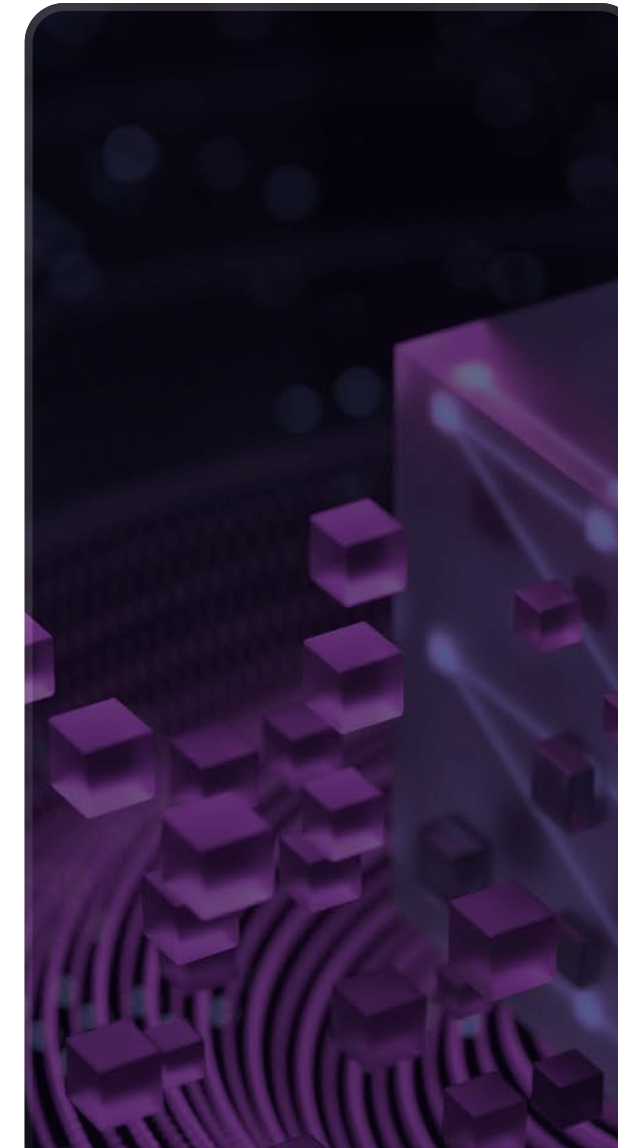

Preparing Your Data for AI:
Aparavi Makes It Easy

Data Normalization -
Aparavi normalizes unstructured data from multiple sources.

Total Visibility -
Provides complete visibility and governance.

Seamless Integration -
Connect, clean, and load directly into a chatbot or AI model.

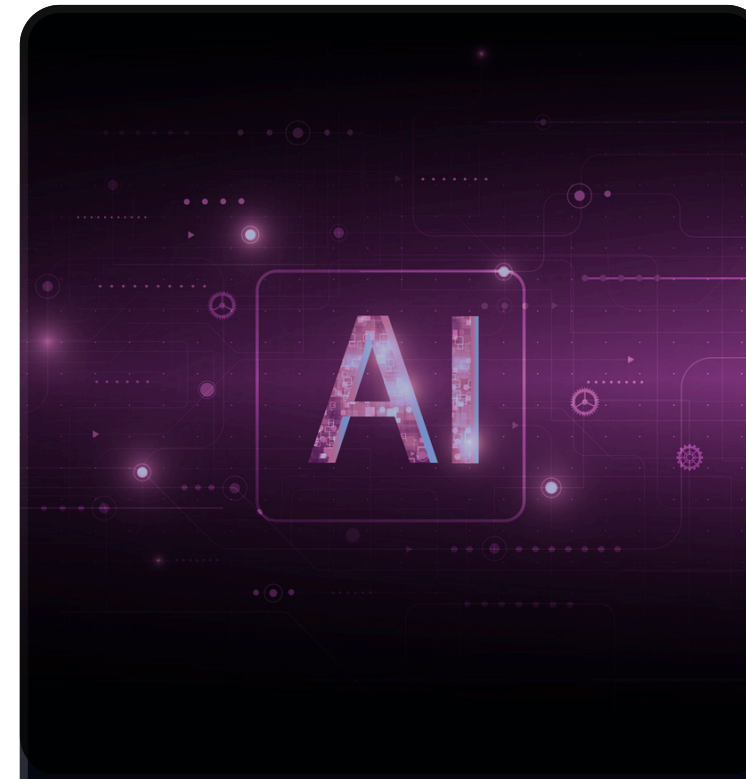

Cost Efficiency -
Avoids costly GPU over-processing with efficient CPU utilization.

Make A Real Impact

Take Control of Your Data,
Empower Your AI

Discover how Aparavi makes data preparation effortless.

Learn from the experts who know unstructured data best.

Start your journey to reliable AI with prepared data.

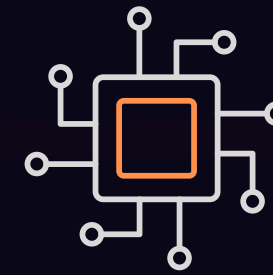

Ready to make your chatbot as smart as your data?
